

SharpLynx v9

Upgrade Instructions

Congratulations on upgrading to SharpLynx v9!

The following upgrade instructions provide an overview of the basic steps required to upgrade your software. Please contact your SharpLynx Reseller or Support Provider if you need any assistance.

Upgrade Instructions

1. Using your original version of SharpLynx make a backup of your SharpLynx data file (*Data > Backup Data File*)
 2. Download the SharpLynx v9 installer from <http://sharplynx.com/downloads/>
 3. Install SharpLynx v9 on the same PC as your old version of SharpLynx
Note: If you are going to install SharpLynx v9 on a new computer then you will need to deactivate the SharpLynx licence on your old computer first.
 4. Copy your data file to the SharpLynx v9 folder
 5. Start SharpLynx v9
 6. Open the data file that you copied to the SharpLynx v9 folder
 7. Follow the prompts to convert your data file
 8. Enter your new licence code when prompted
 9. Check that everything is working ok
 10. Uninstall your old version of SharpLynx
