

# Uniwell Lynx Lite v11

## Upgrade Instructions

---

Congratulations on upgrading to Uniwell Lynx Lite v11!

The following upgrade instructions provide an overview of the basic steps required to upgrade your software. Please contact your Uniwell Lynx Reseller or Support Provider if you need any assistance.

---

### Upgrade Instructions

1. Using your original version of Uniwell Lynx Lite make a backup of your Uniwell Lynx Lite data file (*Data > Backup Data File*)
  2. Download the Uniwell Lynx Lite v11 installer from <https://lynxsoft.net/downloads/>
  3. Install Uniwell Lynx Lite v11 on the same PC as your old version of Uniwell Lynx Lite  
*Note: If you are going to install Uniwell Lynx Lite v11 on a new computer then you will need to deactivate the Uniwell Lynx Lite licence on your old computer first.*
  4. Copy your data file to the Lynx Software Data folder (C:\Lynx Software\Data)
  5. Start Uniwell Lynx Lite v11
  6. Open the data file that you copied to the Lynx Software Data folder
  7. Follow the prompts to convert your data file
  8. Enter your new licence code when prompted
  9. Go to *Data > POS Terminals* and modify your terminal ...  
Check the PRG File link ... if the PRG file is in your old Uniwell Lynx Lite folder then it is recommended that you copy it to the Lynx Software Data folder (C:\Lynx Software\Data) and then edit the PRG File link so that it points to the PRG file in the Lynx Software Data folder.
  10. Check that everything is working ok
  11. **Important:** Do a Send Program to your POS terminal and accept the prompt to allow Uniwell Lynx Lite through your Windows firewall
  12. Uninstall your old version of Uniwell Lynx Lite
